

Thinking about installing batteries in the future?

You need Reposit First

Get the whole picture with
Reposit First smart monitoring

Take the first step

Reposit First monitors your energy usage to help assess if batteries are right for you.

Reposit's advanced software learns when you use energy and how much.

Start your energy storage journey at a fraction of the cost with Reposit First.

Reposit First combines simple visual displays with high accuracy metering all for no ongoing monthly costs. Simply add a compatible battery to earn GridCredits™*.

Actual size

Compatibility

- Single, dual and three phase homes.
- All solar inverters available in Australia.
- Multiple solar systems on the same site.
- Apple iOS, Android or web browser.
- Requires internet: Ethernet, wifi or 4G.
- Requires installation from a Reposit approved licensed electrician.

Reposit First is available for homes with and without solar power installed.

Weekly tariff

Energy flow

Daily usage

For households without solar power

- View and track your home energy costs.
- Audit your energy bill.
- Monitor individual circuits (eg hot water or pool).#
- Assess if solar and batteries are right for you.

For households with solar power

- View and track your home energy costs.
- Audit your energy bill.
- Use your solar more efficiently.
- Monitor individual circuits (eg. hot water or pool.)#
- Divert excess solar power to your electric hot water.#
- Assess if batteries are right for you.

For when you add batteries

- You keep your existing Reposit account with all your usage and solar history.
- Reposit shares your usage and solar history with your battery.
- Automatic weather predictions keep your battery filled with cheap energy.
- Become a smart consumer and sell excess power back to the grid when prices are high.
- Earn GridCredits™* and lower your power bill.

* Visit the Reposit website for participating GridCredits electricity retailers. GridCredits™ currently only available in NSW, VIC, South East QLD (Energex), SA and ACT.

Coming soon.

Upgrading to Reposit with batteries is easy

Your accredited Reposit installer can upgrade your Reposit software when you install your new battery.

When you upgrade to a Reposit battery system, all your user data moves with you, so you can compare your energy savings over time.

Why Reposit?

- Choice of compatible batteries and inverters.
- No ongoing costs.
- Local support.
- Designed and assembled in Australia.
